

ENVIRONMENTAL COMPLIANCE?

WELCOME TO TERRA SANA

TERRA SANA is an Australian company providing specialised environmental services for businesses. Highly qualified staff trained in Australia and abroad is dedicated to delivering cost effective, innovative and sustainable solutions tailored to specific project requirements.

COST AND QUALITY

TERRA SANA is a partnership of industry experts, and our costs include only the effective services and no corporate overheads.

Environmental Management System (EMS)

An EMS is an essential tool to manage the impacts on the environment and minimise your company's environmental liability. EMS provides a structured approach to planning and implementing environmental protection measures. Terra Sana has the expertise to help in developing, implementing and auditing the EMS according to the ISO14000:2004 standard.

Legal Compliance Advice

With an increase in awareness to legal environmental obligations, it has become more important for companies to identify and comply environmental laws applicable to their activity.

TERRA SANA has the capability to help organizations identify regulatory obligations to avoid noncompliances.

Environmental Monitoring

Terra Sana can manage your environmental monitoring requirements, skilled Field Technicians are able to assist with environmental samples collection for air, soil and groundwater analysis. Highly qualified Environmental Scientists can provide accurate data assessment and concise reporting.
